

A Integrated bounded model

PRFT-high AML: bounded integrated model

B Evidence layers

Evidence hierarchy

C Exclusions and limitations

Interpretation boundaries

Single-cell	Processed tables only; no raw object, h5ad, 10x matrix or UMAP coordinates.
Bulk immune	Signature-based inference; not formal immune cell deconvolution
BeatAML	Ex vivo drug AUC associations; not clinical treatment response
PPI	Network-level prioritization; not mechanism proof.
Alternative splicing	No PSI/event-level AS input; formal AS omitted.
External validation	GSE6891/GSE14468 excluded from formal validation after audit.

D Next validation map

Future validation priorities
